## **If you find a baby hare, leave it right there!**

It is normal for baby hares to be left alone all day, the female will come back at night to feed them.

She does this to keep her babies safe!

**If you find a baby hare, just remember, leave it there!**

If you are concerned about the well-being of a baby hare or any other wildlife, please call **780-914-4118** or visit **wildlife-edm.ca** for advice.
